told me that he had persuaded a lesser sheikh to drink a bottle of rye.

A Shiekh, it may be explained, is another name for Chief, although nowadays many of these petty rulers regard themselves as Princes; their desert forts have become palaces, and the advisers and secretaries who form the 'court' have been elevated to the rank of Ministers. This local grandeur is self-assumed, and the only genuine Prince in the Oman peninsula is the Sultan of Muscat. The Bedouins jokingly refer to the town sheikhs as 'Sand Kings', and the description seems to be an apt one.

The word 'sheikh' is fairly common as a name in Arabia, although it does not connote royal blood or connexions; we had a coolie in the Fort who was called Sheikh Ahmed. Similarly, the word 'Saiyed' is much used as a name, but bears no relation to the title Saiyed, borne by alleged lineal descendants of the Prophet or his son-in-law.

The Arab world has practised the doctrines of Islam for close on thirteen centuries, yet even to-day one finds the people accepting ancient beliefs and superstitions which are the heritage of heathenism. The uneducated Arab firmly believes in the existence of djinns, and nothing will persuade him to venture near a *wadhi* or deserted building which tradition has made the home of these monsters. Good and bad luck are ascribed by the faithful to Allah, Whose ways are wise and inscrutable; yet even the orthodox will admit—a trifle shamefacedly, perhaps—that such and such a calamity was caused by a malicious djinn, or that the death of his favourite camel was due to the evil eye of a neighbour.

Demoniacal possessions are cured by dancing to the throb of drums, a survival, surely, of African rites, and it is significant that most of these primitive beliefs are held by Arabs of African or negro descent. But then, is there such a thing as a pure-blooded Arab? I have heard people describe themselves as being pure-blooded Irish, although they had less claim to consanguine purity than myself; they took no account of the Danish, Norman, Spanish and English invasions which swept the length and breadth of that small island over a thousand years. Just as the Irishman is basically Celt, the Arab is basically Semitic, but even the greatest ethnologist or anthropologist cannot track down with absolute certainty the ultimate origins of the Arab race; if it is one race. Head-measurements and the division of skulls into brachycephalic and dolchycephalic are all very well; they are useful for classifying the human
